Explanation of the Articles in the Calendar.

These pages are calculated for Toronto, Quebec, Fredericton and Halifax, and for ordinary purposes will serve with sufficient accuracy for every city in the Dominion of Canada.

The times of the Sun's RISING AND SETTING are given for the upper limb, and are corrected for refraction for Toronto, Quebec, Fredericton, Halifax, and Fort Garry.

The civil times both for the rising and setting of the Moon's centre are given for every day for Toronto, Quebec, Fredericton, Halifax, and Fort Garry.

The column, Sun on Meridian, gives the time that a watch should show when the shadow of a sun dial is on the noon mark.

Moon's Age .- This column shews to the nearest tenth of a day the Moon's age at Toronto Noon.

The column, MOON ON THE MERIDIAN, gives the mean time at which the Moon's centre passes the meridian of longitude 4h. 48m. W. When in the column headed Moon's rising or setting, or Moon on meridian, the letters A.M. occur, unaccompanied by any number, they denote that the numbers given for the succeeding days relate to the morning, and those for the preceding days to the afternoon, but that the Moon does not rise or set or cross the meridian (as the case may be) on that day.

The Moon's Meridian Zenith Distances are given to the nearest tenth of a degree for a point in latitude 45° and longitude 4h. 46m. W. They are not corrected for parallax or refraction.

The column, Upper Transit of Pole Star, shows for every day the mean time at which the Pole Star makes its upper transit across the meridian of longitude 4h. 46m. W. It passes the meridian in the morning from April 10 to October 8. It passes the meridian twice on October 9; and in the afternoon during the rest of the year.

The time at which the lower transit of the Pole Star occurs may be found by adding 11h. 58m. 2s. to the time of its preceding upper transit.

The six last columns will serve with sufficient accuracy for the whole of Canada.

From the time of the upper transit of the Pole Star may be found the time of its greatest western or eastern elongation, by adding or subtracting the constants given in the annexed Table.

Moon's Phases.—This Table gives the times for the four meridians when the moon passes the geocentric longitudes of 00, 900, 1800, and 2700 east of the sun. It gives also the times of her greatest and least distance from the earth.

TWILIGHT.—In this table are given the times at which twilight begins in the morning and ends in the evening, i.e., the times when the sun's centre is 18° below the horizon.

GREATEST ELONGATION OF THE POLE STAR.—This column gives the greatest azimuth of the Pole Star east or west from the meridian as observed at a place in latitude 45°. When the greatest elongation corresponding to any other latitude is required, the number given in the column should be corrected by means of the following Table.

Latitude	420	430	440	450	460	470	480	490	500
1st Correction for Degrees	-5' 38"	-3' 51"	-1' 59"	0' 00''	+ 2' 4"	+4' 16"	+6' 35"	+ 9'2"	+11/37/
2nd Correction for each minute of latitude	+ 1.8"	+ 1.9"	+ 2.0"	+ 2.1"	+ 2.2"	+ 2.3"	+ 2.4"	+ 2.6"	+ 2.7"

The 1st correction for the degrees of latitude is to be subtracted from the greatest elongation given in the calendar or added to it, according as the degrees of latitude are less or greater than 45°.

The 2nd correction, which is always additive, is found by multiplying the number given in the third line of the table by the number of minutes in the latitude.

If the altitude of Polaris above the horizontal plane observed at the time of its meridian transit be corrected for refraction, the latitude of the place of observation will be found by subtracting the polar distance from the altitude so corrected, for the upper transit, and by adding the polar distance to the corrected altitude, for lower transit.

By observing Polarls with a horizontal circle at the time of its upper or lower meridian transit, the direction of the meridian may also be found; but as its motion in azimuth at these lustants is more rapid than at other points of its course, any error in the time will then produce the greatest possible effect on the azimuth. Near the time of greatest elongation, on the other hand, the change of azimuth is very slow; so that an error in the supposed time of observation will occasion a comparatively small error in the azimuth. On this account, the instant of greatest elongation east or west of the meridian is the time most favourable for the determination of the meridian.

Again, as the point of greatest elongation is the one at which the change of altitude is most rapid, any error in the time will produce a comparatively large error in the altitude. Hence this point of the star's path is the worst that could be taken for finding the latitude.

As the transits of Polaris and the times of its greatest elongation often take place when the sky is clouded, or during daylight, several days may sometimes pass without the occurrence of an opportunity favourable for these observations with Polaris.

To remedy to some extent this inconvenience, Tables are herewith given which contain the times of transit of two other circumpolar stars, with the intervals between the times of transit and of greatest elongation; and also the azimuths at the same instant.

In order to harmonize with the rest of the Calendar, where the times of transit of Polaris are placed, the transits of that star are given in civil time; for greater convenience, however, the transit of δ and ϵ Ursæ Minoris in the following Tables are in astronomical time. For the sake of brevity the times are given for the 1st, 11th, and 21st of each month, and also on those days when two transits take place.

The times of meridian passage on any intermediate day may be found with sufficient accuracy by subtracting the following numbers from the recorded time which next precedes it in the Table.

THE PLANETS.—The times of rising and setting of the five chief planets are calculated for Toronto, and are corrected for refraction. The times of culmination, although computed for the meridian of Toronto, will serve approximately for the whole of Canada. The meridian zenith distances, being designed merely to aid in finding the planets, have been given only to the nearest tenth of a degree, as seen from the latitude of 45°.

Star Table.

From the times of the Upper Transit of the Pole Star may be derived, with the aid of the following Table, the times of pulmination, and of the rising and setting of the principal fixed stars, as seen from the parallel of 45° north latitude

To ascertain when any star found in the following Table will be on the meridian, add the number in the left-hand column of figures to the preceding meridian transit of the pole star given in the calendar. To find the time of rising of a star, subtract the number opposite to it in the right hand column of figures from the time of its meridian passage. For the setting of a star, add the same number to the time of its meridian passage. Those stars marked (.....) revolve in a circle of perpetual apparition, and do not rise or set at places in and to the north of latitude 45°.

Eclipses.

In the year 1874 there will be two eclipses of the Sun, and two of the Moon, and a transit of Venus over the Sun's disc.

I.—A total eclipse of the Sun, April 15-16, invisible in Canada. This eclipse is visible in South Africa, and as a partial one in the southern part of South America.

II .- A partial eclipse of the Moon, May 1, invisible in Canada.

III.—An annular eclipse of the Sun, October 9-10, invisible in Canada. This eclipse is seen as a central one in Siberia.

IV .- A total eclipse of the Moon, October 24.

The local astronomical mean time at which the various phases occur at different stations, are given in the following Table.

(a) Letters can be registered to Shanghae, in China, and to Yokobama, in Japan, by San Francisco, but to no other place in either country.

(b) Printed Prices Current and Mercantile Circulars can, where this letter is prefixed, be forwarded as Newspapers.
(c) The postage to be collected on Newspapers for the Sandwich Islands is two cents for each paper, and an additional charge of one cent for each two ounces weight or fraction thereof; thus, on a single paper weighing three ounces, collect four cents. In this case, Canada retains the two cents charged on each paper, and the postage of one cent per two ounces weight only is credited to the United States.

* Where an asterisk is prefixed, an additional charge of one cent per two ounces weight on Newspapers and one cent per ounce on Books and other Printed Matter must be collected, and the whole of this additional charge must be

credited to the United States.

Registration can be effected on correspondence for those places only to which the fee is given.

POSTAGE RATES, ETC., ON PATTERNS AND SAMPLES WITHIN THE DOMINION.

Patterns or samples of merchandise and goods for sale, not exceeding 24 oz. in weight, may be posted in Canada to be forwarded to any place within the Dominion, on prepayment by postage stamp of a rate of 1 cent per ounce, under the following regulations:

If such rate be not fully pre-paid by the stamps affixed, the packet is to be rated with the deficient postage and a

fine of five cents in addition.

Packets of samples and patterns may be registered on pre-payment by postage stamp of a registration fee of 5 cents in addition to the postage rate, and provided such packet be handed in to the Post Office for registration.

Patterns or samples must be sent in covers open at the ends, so as to be easy of examination. Samples, however, of seeds, drugs, and so forth, which cannot be sent in open covers, may be enclosed in bags of linen or other material, fastened in such a manner that they may be readily opened; or in bags entirely closed, provided that they be transparent, so that the officers of the Post Office may be able to satisfy themselves as to the nature of the contents.

The packet may bear on the outside the address of the sender, in addition to the address of the person for whom it may be Litended; also a trade mark and numbers, and the price of the article enclosed; inside, there must be no enclosure but the samples or patterns themselves; the particulars, however, of the trade marks, numbers and price, may be marked on the articles themselves; instead of on the outside of the packet, at the option of the sender.

Patterns or samples of merchandles cannot be forwarded by mail between Canada and the United States.

POSTAGE RATES, ETJ., ON PATTERNS AND SAMPLES TO UNITED KINGDOM AND FOREIGN PARTS.

Patterns of merchandise, and samples, may be forwarded between Canada and the United Kingdom, France, Italy, German Empire, Netherlands, Portugal, Switzerland, and Denmark, by the Canadian Packet mails, at book post rates, and subject to the following conditions:

There must be no writing or printing other than the address of the person for whom the packet is intended, the manufacturer's or trade mark and number, and price of the article.

Samples of seeds, drugs, and similar articles intended for delivery within the United Kingdom, may be sent in bags entirely closed, provided such bags be transparent. Bags entirely closed must not be used for the transmission of seeds to foreign parts.

Scissors, knives, razors, forks, steel pens, nails, keys, watch machinery, metal tubing, pleees of metal or ore, and such like articles, are now allowed to be forwarded by the Post as samples, provided they be packed and guarded in so secure a manner as to afford complete protection to the contents of the mail bags, and to the persons of the officers of the Post Office. Such articles, however, must be so packed that they may be easily examined; and any packet containing such articles, which may be found to be insufficiently guarded, will not be forwarded by Post.

None of the articles named in the next preceding paragraph may be sent as patterns or samples to any place abroad, except Germany. Belgium, and the British Colonies, and not to these places when addressed via France.

List of Post Offices in Canada on the 1st October, 1873.

The Offices printed in Italies are authorized to grant and pay Money Orders. The Offices marked * are Savings Bank Offices. The letters "W. O." following the name of a Post Office, signify "Way Office." The capital letters on the right of the County column indicate the several Provinces of the Dominion.

To meet the wishes of many of our friends in Ontario, we have, though only in the case of that Province, substituted the name of the Township in which the Post Office is situated for that of the Electoral Division. Should the name of the County also be required, reference may be made to the list of Township Municipalities (see Index).

LEGAL AND JUDICIARY.

THE LAW SOCIETY OF ONTARIO.

The Law Society was first established in 1797, by the act 37 Geo. III. c. 13, which enabled the then practitioners of the law to form themselves into a socie'y and make rules for its government. By the act of 1822, 2 Geo. IV. c.5, "the Treasurer and Benchers of the Law Society" were formally incorporated; and under these and other statutes the Society has continued to be governed by a Board of Benchers, in the same manner as the various Law Societies of England. By the act of last session, 34 Vic. c. 15, the Benchers heretofore appointed from time to time by their own body, are made, exclusive of ex officio members, elective by the Bar, the ex officio consisting of the Attorney General for the time being, and all members of the Bar of Ontario who have at any time held the office of Attorney or Solicitor General of the former province of Upper Canada, and any retired Judge of the Superior Courts of Law or Equity of Ontario; the elective, thirty in number, being chosen by ballot, for a term of five years, by the members of the Bar, in manner prescribed by the act. Vacancies during the term to be filled by the remaining Benchers. The Judges of the Superior Courts are Visitors of the Society, and, on the first day of Easter Term, annually, the Benchers appoint one of their body to be Treasurer, who is also President of the Society. The Benchers sit in convocation every term for the call of Barristers, the admission of Attorneys and Solioftors to practice, and of Students to enter the Society, the fees paid by whom form the revenue of the Society. Oggoode Hall, appropriately named after the first Chief Justice, is the Outarlo "Inn of Court," or head quarters of the Society, in which is provided accommodation for the Courts of Equity, and for the sittings in term of the Superior Courts; with a valuable and extensive library.

As interest is in this country generally payable half-yearly, the half-yearly rate has been taken as the basis, and the calculations are made on the true yearly rate.

yearly, the hatcycarly rate has been taken as the basis, and the calculations are made on the true yearly rate corresponding, and not the nominal rate. Thus 10 per cent. per annum, payable half-yearly, is understood to mean 5 per cent. per half-year, the true yearly rate in this case being 101; for, \$100 being put out for one year at 5 per cent. per half-year, would amount at the end of the year to \$110.25.

The instalments in the Table are to repay a loan of

\$1,000 in any period from 1 to 20 years.

The instalment to repay a loan of any other amount can be found by multiplying the instalment in the Table by the amount of the loan, and removing the decimal point three places to the left.

Ex. 1.—What is the half-yearly instalment to repay

a loan of \$1,000 in 12 years?

The required instalment is found in the column headed half-yearly, horizontally opposite the number 12, to be \$72.48.

Ex. 2.—What is the monthly instalment to repay a

loan of \$1,000 in 15 years.

The required instalment is found in the column headed monthly, horizontally opposite the number 15, to be \$10.63.

Ex. 3.—What is the yearly instalment to repay a loan

of \$1,850 in 8 years.

The required instalment is found by multiplying 189.16, taken from the column headed yearly, opposite the number 8, by 1,850, and removing the decimal point three places to the left, to be \$349.95 nearly.

TO THE PUBLIC.

The "Isolated Risk Fire Insurance Company" having been established solely with the view of insuring against loss or damage by Fire the owners of Isolated or Non-Hazardous Properties, the Directors therefore respectfully direct the attention of Insurers to the following:—It will adjust all losses without delay, and pay over the cash at once. It being the first Stock Company to give reasonable rates, and not impose on those whose Properties are non-hazardous the burden of making up the losses by those whose Properties are hazardous, the Directors would, with every confidence, look to the public for support.

We claim for our Pianos that they are equal to any imported instrument in every respect.

We claim that our Pianos are at least \$100 to \$150 cheaper than any imported Pianos of the same class.

We hold, therefore, that it is worth affording our home enterprise a large support. Call and examine, and fully test.

We are General Agents in Ontario for the celebrated TAYLOR & FARLEY ORGAN COMPANY, of Woreester, Mass., whose instruments rank at the head of all Organs.

Committees of Churches and other Societies will find it to their interest to examine and compare our Organs before buying elsewhere. Liberal terms offered to Churches.
